

Ameritrans buses are designed with generous leg and headroom and with large windows for comfortable viewing.

Every bus is built to meet our customer's specific requirements and can be outfitted to suit a variety of business and personal needs or tastes.

Every Ameritrans interior is constructed with quality fabrics and components. We pay close attention to each detail.

This Ameritrans 26-foot bus accommodates up to 23 passengers and adapts well to specialty applications. The Ameritrans 265 is built on the E450 Ford Chassis and has driver/co-pilot cockpit seating.
